To: Medha Sriram <medhasriram245@gmail.com>

Dear Medha Sriram,

Subject: manuscript #262: "Predictive KV Cache Amortization for Edge Language Model Inference on Mobile Devices" acceptance

Congratulations, once again on the acceptance/conditional acceptance of your paper in ICEdge 2026. The exact details of the session and the time for your presentation will be available on the website by Oct 15, provided you submit the camera-ready version of the paper by Oct 5, 2026 for IEEE publication. Please take care of any relevant comments from the reviewers in the final submission - however, which comments needed to be taken care of - is up to you.

On the other hand, Adhering to the following AI and formatting-related policies is a must for the camera-ready versions:

- (1) Please use the free pangram tool for AI content checking (<https://www.pangram.com>). This is being used by leading conferences such as NeurIPS (please see more details here: <https://blog.neurips.cc/2026/06/02/ai-generated-papers-in-the-neurips-2026-position-paper-track/>). Please use this tool and make sure that the AI generated content in your paper to <25% (must to have criteria) in the default setting of the pangram tool.
- (2) There must not be any AI-generated figure in the final version of the paper
- (3) Any other use of AI (including but not limited to text paraphrasing, writing code etc.) must be disclosed in the acknowledgments section. The AI system used needs to be identified, as well as the specific section of the article that uses AI (including the use of AI for editing and grammar).
- (4) Please make sure that the final submitted pdf has high quality images (please use vector graphics formats while preparing the manuscript)
- (5) Please do not stretch any figure in a way that changes the original aspect ratio. Please make sure that the figures use font sizes and color schemes that are readable and pleasing to the eye.
- (6) Please follow the general IEEE guidelines (margin widths, fonts, referencing style etc.), the paper must not exceed the allotted 6+1 pages (the last page is only for references), and use proper formatting policies recommended by IEEE. In case you need to change the template, they can be found in <https://www.ieee.org/conferences/publishing/templates>.
- (7) Please make sure that the white spaces used in the paper add to the readability without looking out-of-place (such as long gaps before/after a section, before/after a figure, or at the end of a page)

We thank you for the high-quality submission and for your contribution to the conference. Please note that the camera-ready submission link is now active in your CMT portal - please submit the final version by October 5, 2026.

Also, please note that the registrations for ICEdge 2026 are now open - please register using <https://receipts.iisc.ac.in/form/v1/conferences/IISc-conf-ICEdge-2026/registration> by October 15, 2026 to avail the early bird registration offer.

For students, we shall provide ~80 student travel grant awards (for free registration) - please apply using <https://forms.gle/Yi2pZCh5fufxT9yq9> by October 8, 2026. This is open to all students.

With your help, we hope to make ICEdge 2026 a grand success. Let us know if you have any questions.

With best regards,
Baibhab Chatterjee, Akhilesh Jaiswal and Bibhas Ghoshal
ICEdge 2026 Program Committee Chairs
